## **NOAH'S ARK WATERPARK STATEMENT**

The health and safety of our Guests, Team Members and communities in which we operate, including the Wisconsin Dells, are our top priorities. Noah's Ark Waterpark has implemented intensive health and safety measures to best protect these stakeholders from exposure to COVID-19 while also allowing for some normalcy and escape from the challenges of everyday life. It is important to note that Noah's Ark Waterpark set the standard for safety measures among its peers in the Dells by requiring Guests wear facial coverings to enter the park and when not enjoying the pools, slides and rides. Noah's Ark also requires pre-entry temperature checks, limits capacity, and installed dozens of hand sanitizing stations to complement new, enhanced cleaning protocols throughout the park and its high-traffic areas. More information on these safety measures can be found at [www.noahsarkwaterpark.com/summer2020](http://www.noahsarkwaterpark.com/summer2020).

We understand the challenges local governments face in trying to protect their constituents in these uncertain times. Noah's Ark and Palace Entertainment commit to comply with local, state and federal guidelines, and support our local leaders as they serve the public health needs of the community. The emailed comments do not reflect the views of Noah's Ark Waterpark or Palace Entertainment, and the person who made them is no longer employed with us.

--Bill Lentz, Vice President of Water Parks, Palace Entertainment
